RE: Powertech permits

I'm writing to you today to oppose the issuance of permits to Powertech allowing the drilling of thousands of wells within the 14 different fields through the aquifer. We don't want disposal wells - - we don't want Uranium mining! There is no part of uranium mining that is life-sustaining. Uranium mining devastates our land and water. It makes water poisonous for all living beings.

Water is a finite resource - - all the water that is on earth today is all the water that we will have for all of time.

The indigenous communities have treaties to this land. Please honor our shared resources and the sacred treaties.

Our word is our honor.
